

# HEY!!

***Who turned out the lights?!?***

**-\$- ... the transition's tricky -\$-**

# Renewable Energy Transition Disasters:

- **New Zealand**: 2018, 1st country to ban all new oil/gas exploration. “The world has moved on from fossil fuels” *NZ Prime Minister Jacinda Ardern*  
> Exploding energy prices left households in disarray: 110,000 with little to no heat, 19% struggling with bills, 40,000 power cut off due to unpaid bills. *Failed Ban Lifted 6/2024*.
- **Germany**: After a decade of mistakes, including shuttering their nuclear power, ignoring fracking and relying on cheap Russian gas now largely cut off, Germany is “*descending to third world status*”, its hapless political class has no idea how to turn that around – and will take the rest of the eurozone down with it. *Daily Telegraph 6/12/2024*

***Wyoming Must Do Better!***     ***PeteFoxHD56.com***

- NCHS '82 / BS-Mechanical Engineering UW
- **30+ years global integrated oil & gas experience - Downstream/Mid-stream/Upstream**
- I'll proudly add bench strength with our Legislators in defining '*what good looks like*' across Wyoming's existing / future revenue streams & budgeting efforts.
